ASHISH CHAHAR

Greater Noida, India I +91- 8800763567 I Chahar.26ashish@gmail.com

SUMMARY

Experienced Senior Software Engineer at HCLTech, serving as the Subject Matter Expert (SME) for Jama Connect with expertise in requirements management, ALM, and process improvement. Skilled in end-to-end Jama Connect administration, including system configuration, workflow and field customization, user management, Velocity scripting, reporting, configuration management, Risk Center administration, Jama Connect Integrations (JCI), and large-scale data migration. Previously served as Lead Jama Connect Administrator for Stryker's India and Redmond, USA teams, managing global Jama environments and supporting enterprise programs. Proficient in Automotive SPICE, V-Model, IBM Jazz, Rational DOORS, and quality assurance, with a strong focus on requirements traceability, regulatory compliance, and scalable engineering solutions.

WORK EXPERIENCE

Senior Software Engineer

HCLTech | Oct 2025 - Present

- Serving as the Jama Connect Subject Matter Expert (SME) at HCLTech, providing end-to-end administration, configuration, and technical support across multiple enterprise client engagements.
- Managing complete Jama Connect configuration, including project setup, item types, relationship rules, workflows, pick lists, permission models, and configuration management.
- Designing and developing custom reports and dashboards using Velocity Template Language (VTL) to support project tracking, compliance, audit readiness, and stakeholder reporting.
- Independently designing, configuring, and maintaining Jama Connect Integrations (JCI), including Risk Center integration and enterprise integrations with external systems such as Jira.
- Leading end-to-end data migration activities, including IBM Rational DOORS to Jama Connect migration, legacy data migration, data mapping, cleansing, validation, transformation, and post-migration verification.
- Establishing comprehensive end-to-end requirements traceability by configuring relationship rules, trace models, and bulk import frameworks using structured CSV templates and automation techniques.
- Configuring and administering Jama Risk Center, including risk item types, workflows, relationships, traceability, and compliance reporting aligned with organizational and regulatory requirements.
- Driving Jama–Jira integration to enable seamless synchronization of requirements, defects, and development artifacts across engineering teams.
- Providing advanced technical support by troubleshooting complex configuration issues, resolving data inconsistencies, supporting audits, and mentoring project teams on Jama best practices.
- Leveraging advanced Excel functions and automation techniques to optimize data preparation, validation, bulk imports, exports, and migration activities.

Software Engineer

Stryker | Apr 2025 - Oct 2025

- Serving as the primary Jama Connect Expert and divisional administrator for Stryker India, overseeing all major project implementations including LP35, LP15, LPCR2, Roadrunner, Vader, Keystone, and other global initiatives.
- Spearheading Jama Connect administration for both India and Redmond, USA, ensuring system integrity, user management, and alignment with organizational and compliance standards.
- Designed and developed project-specific custom reports using Velocity Template Language (VTL) to meet evolving stakeholder and regulatory reporting needs.
- Led the implementation of a centralized ticketing system to streamline issue tracking, resolution workflows, and support operations across multiple project teams.
- Expertly manage user roles, permissions, and group policies, maintaining strict control over access levels while supporting project scalability.
- Conducted comprehensive requirement traceability analysis, ensuring end-to-end visibility.
- Engineered custom traceability plugins, automating the setup of complex trace relationships in Jama through structured CSV uploads, enhancing efficiency and system usability.
- Act as the key point of contact for Jama-related escalations, system enhancements, and global collaboration between cross-functional teams in India and the USA.

Software Engineer

Prolifics corporation Ltd., Hyderabad | 2021 - 2025

- Contributed to the Aetna ClaimsUI project by enhancing user interface functionality, improving application usability, and supporting feature development.
- Managed application deployments in Linux environments using PuTTY, ensuring secure, stable, and efficient release management.
- Handled incident and change management through ServiceNow by investigating, troubleshooting, and resolving production issues within SLA timelines.
- Supported Automotive projects by ensuring compliance with Automotive SPICE (ASPICE) processes, quality standards, and project requirements.
- Certified Automotive SPICE Provisional Assessor with experience conducting process assessments, gap analyses, internal audits, and driving continuous process improvement initiatives.
- Delivered ASPICE (VDA Scope) training sessions and quality reviews to improve process maturity and engineering compliance across project teams.
- Provided administration and technical support for IBM Engineering Lifecycle Management (IBM Jazz), including CCM, RM, JTS, EWM, and IBM Rational DOORS.
- Administered Jama Connect by managing users, permissions, system configuration, custom reports, and project setup activities.
- Executed Jama Connect data migration activities, ensuring accurate migration of requirements, relationships, traceability, attachments, and project structures across environments.
- Supported onboarding of new Jama Connect projects by configuring project structures, item types, workflows, templates, and end-to-end traceability models based on customer requirements.

EDUCATION

B.Tech Computer Science and Engineering

- CGC COLLEGE OF ENGINEERING

2017 - 2021

10th and 12th

- Kendriya Vidyalaya

2015 - 2017

SKILLS

- Operating System - Windows, IOS Development process - SDLC/V Model
- Process Knowledge - Automotive SPICE
- Requirements Management - Sharepoint/DOORS/Integrity/Jama Connect
- Change Management - Service Now/ RTC Tools/ JIRA
- Progress Monitoring - Share point/ PPT/ Microsoft project
- Software Development - VS code, GIT GUI, Eclipse, Putty, Filezilla

CERTIFICATIONS

- intacs® Certified Provisional Assessor (Automotive SPICE®)

AWARDS

- PEP (Prolifics Excellence Performance Award)
- Two times SPOT Award HCLTech
